

Monitor your Progress Year 5

WATER: The most valuable resource on the planet. You will learn about things you take for granted. How your water makes it into your tap!

How much do you know?

			
I can draw the water cycle giving definitions for the following terms: Evaporation Condensation Precipitation			
I know what percentage of water is fresh, in the oceans and in the ice caps.			
I can label the main oceans of the world.			
I can name the major rivers of the world.			
I can explain where we get fresh water from with the use of a diagram.			
I understand how much water I use in my daily life.			
I can recommend ways of saving water usage in the home.			
I can describe where water is found in Africa and why.			
I can explain the problems of water shortage in Ghana.			
I can explain how South West Water: Collects fresh water Treats water Provides water to the South West of England.			
I can describe in detail a reservoir that I have visited.			

Enjoy this fun topic, but stay up to date with your folders. Speak to me if you are behind at all I really want to help you. Mr Pilkington
