

Monitor your Progress Year 8

EARNING A LIVING: This is an interesting module that focuses on how humans work and use the world around them. You will look at the different sections of jobs, in particular farming and the car industry.

How much do you know?

			
I can explain what primary jobs are and give examples.			
I can explain what secondary jobs are and give examples.			
I can explain what tertiary jobs are and give examples.			
I can explain what quaternary jobs are and give examples.			
I know what arable farming is.			
I know what pastoral farming is.			
I know what mixed farming is.			
I am able to show on a map of the UK where different types of farming generally occur.			
I understand the words relief and climate.			
I know what a factory is.			
I understand the factors involved in the location of a factory.			
I know what manufacturing is and can give examples of it, inputs, processes (throughputs) and outputs.			
I am able to describe where and what the car industry is in the UK.			
I can give an example of a car industry and where it chose to locate its factory in the UK.			
I know why transnational corporations (TNC's) make things in LEDC's.			
I can give an example of manufacturing in an LEDC and give the advantages/disadvantages this brings to an area.			

Whilst doing this topic you must be revising all your previous topics for your exam.
