

Classification (Biology)

Year 6, Autumn Term

<i>You will be taught</i>	<i>You should know</i>
to classify living things into the major taxonomic groups	how to use a simple key to identify a plant or animal
	that animals and plants are classified into separate kingdoms
	that bacteria, fungi and single-celled organisms are placed in other kingdoms
	the characteristic features of the animal and plant kingdoms and why fungi are not included with plants
	how to tell whether something is a single-celled organism , a fungus , an arthropod (I know the difference between insects and spiders), a fish , an amphibian , a reptile , a bird , a mammal and a flowering plant
