

Laboratory Skills (Chemistry)

Year 5, Autumn Term

In the first few weeks of the term the children develop their understanding of working safely in the science laboratory. They light the Bunsen burners and use these to heat liquids and take temperature measurements. They become familiar with the names and functions of laboratory apparatus and learn how to draw and annotate simple diagrams.

Bunsen burner	
Retort stand	
Boss	
Clamp	
Petri dish	
Spatula	
Tongs	
Beaker	
Conical flask	
Funnel	
Thermometer	
Gauze mat	
Evaporating basin
